Appendix G: Assumptions

This Data Quality Mad Dog Report was created given the following assumptions:

- Only the issues ranked as a Top Ten or Quick Hit were expanded upon as part of the Data Quality Mad Dog effort. The remaining issues, though not expanded upon, are documented and should be re-examined as part of ongoing FSA data quality efforts (see **Appendix F**).

- The Data Quality Mad Dog Report provides recommended solutions for the Top Ten and Quick Hit issues, but further efforts will be required in order to implement them.

- FSA Business Owners selected a list of Top Ten and Quick Hit issues. However, the issues were not ranked in order of importance within this list. After reviewing the Mad Dog Report it is recommended that FSA examine the business viability of the Top Ten and Quick Hit solutions and prioritize the recommended implementations.

- The Data Quality Mad Dog report does not provide an execution plan for establishing a continual enterprise wide data quality process. This on-going process will be discussed and documented as part of the Quality Assurance Strategy and Implementation Plan deliverable.
